Pharmacy Performance Summary

Sales operations overview | 01 Jun 2026 – 05 Jun 2026 | Source: pharmacy_sales_sample.csv

Total revenue	Units sold	Transactions	Average revenue / row
■54,260	1,165	10	■5,426

Key findings

• Recorded revenue totals ■**54,260** across **10** transactions and **1,165** units. Average recorded revenue per transaction row is ■**5,426**.
• The largest revenue category is **Supplement** at ■**15,750** (29.0% of revenue). The highest-revenue product is **Vitamin D3 60k** at ■**15,750** (29.0%).
• **Branded** products account for ■36,175 (66.7%) of revenue; **generic** products account for ■18,085 (33.3%). Branded units: 360; generic units: 805.

Revenue by category

Category	Revenue (INR)	Contribution
Supplement	■15,750	29.0%
Cardiovascular	■12,100	22.3%
Antibiotic	■11,625	21.4%
Analgesic	■5,110	9.4%
Gastrointestinal	■4,275	7.9%
Antidiabetic	■3,000	5.5%
Antihistamine	■2,400	4.4%

Data quality, growth & interpretation limits

• Required fields present: 10 rows; no missing values in the supplied 9 columns; reported revenue matches UnitsSold × UnitPriceINR for 10/10 rows. • Daily revenue ranged from ■5,700 to ■18,610. First-to-last available day revenue change: +206.3% (■6,075 to ■18,610); this is a short sample, not a forecast. • **Cost/COGS is absent**, so gross profit and margin cannot be computed. The dataset contains only 10 rows over five days; interpret trends cautiously. Product revenue contribution is not evidence of clinical value or treatment effectiveness.

Recommended next step

Add validated cost/COGS and a longer period of transactions before assessing margins or sustained growth. Use the interactive HTML dashboard to filter by category, branded/generic status, store, and product.
